# Blockchain-Based Question & Answering System (QAS)

A decentralised, anonymous peer-to-peer learning environment for students

Student: Eddie Ng Wei Xuan   **Supervisor:** Assoc Prof Hui Sui Cheung

Project Objectives

This project aims to leverage the potential of blockchain technology to create a decentralised QAS where students of Nanyang Technological University (NTU) can ask any questions related to their course of studies and have their questions answered by fellow peers. A cryptocurrency reward mechanism is adopted to incentivized contributions to the system.
