

Virtual and Constructive Simulation

2-in-1 Simulation – Direct the Soldier to Objective Safely!

Student: Goh Kok Hwee Vincent

Supervisor: Prof Seah Hock Soon

To cope with today's challenging military conflict and associated asymmetric threats. Armed Forces all over the world have been focusing more on their training requirements such as mobility, deployments and joint operations.

Constructive Simulation (2D)

Involves people operating simulated system which is commonly presented in a top-down aerial view.

2 PLAYERS CO-OP

Virtual Simulation (3D)

Involves people operating simulated system which is commonly presented in 3D First-Person Shooter (FPS) perspective.

Evaluates situation awareness, responsiveness, command and control. Virtual and Constructive simulation serves as a platform where organisations can experiment on their processes, structure and concept to obtain meaningful data to improve workplace efficiency as well as analysis.
