TWITTENER

## AGGREGATED NEWS PLATFORM https://twittener.io

Twitter Timeline

Unsophisticated Twitter Timeline with Text-to-Speech feature. You can start listening to your timeline.

Twitter Trends

Learn the multilingual general sentiment towards Twitter Trends.

Topics

Have a holistic overview of Twitter accounts with the same topic.

News Trends

View latest news trends from Google News, Yahoo! News and Reddit.

News Recommendation

View your recommended news articles and start listening to news abstracts

This project aims to create a web application, **Twittener**, that incorporates information from news aggregators with social media platforms. Google News and Yahoo! News were selected as these news aggregators enable readers to save time and effort in finding the latest relevant news. Twitter was used as a reporting tool and Reddit was used to offer a comprehensive overview of the latest breaking news. Besides **news personalisation, sentiment analysis** and **text-to-speech technologies** were employed to improve the user's experience. Essentially, **Twittener** offers an inclusive one-stop site for highly significant news content.
