

First Look at the SusTex Gallery: EDB, SFC, and Fu Yuan Explore Our New Space

SusTex was pleased to welcome the Economic Development Board (EDB), Singapore Fashion Council (SFC), and Fu Yuan for a first look at our newly established SusTex Gallery.

The visit provided a valuable opportunity to showcase our research and laboratory facilities designed to drive textile circularity. It was an insightful session of knowledge-sharing, where our team presented ongoing projects and discussed the future of sustainable material innovation.

We look forward to many more collaborative sessions in this new space as we continue to translate research into impactful real-world solutions.

Dr. Loi Jia Xing sharing insights on our bioremediation work with EDB in the SusTex Laboratory.

Associate Professor Dalton Tay leading a knowledge-sharing session in the newly established SusTex Gallery.
