

LKCMedicine is staffed by distinguished faculty from Singapore and other parts of the world. Eight LKCMedicine researchers were recognised as Highly Cited Researchers in 2025 by Clarivate.

LKCMedicine's curriculum has recently been enhanced with digital health and AI content, with greater emphasis on medical humanities and professional growth.

02/ Research Driven Innovation-Led

In 2021, LKCMedicine attained the ASPIRE Award in curriculum development, in recognition of its excellence in medical education, only the 4th medical school in Asia to have achieved this then.

01/ World's Best Young University*

In 2025, LKCMedicine was awarded the ASPIRE Award for Excellence in Student Engagement.

03/ Award-winning Innovative Curriculum

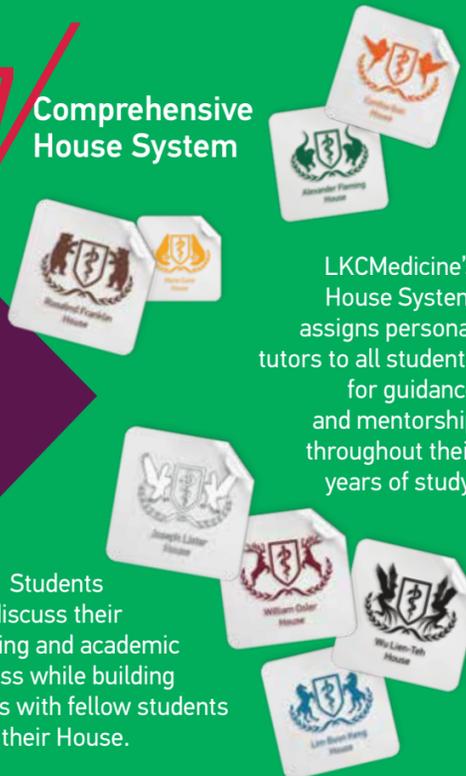

In Years 1 and 2, there is early exposure to patients and clinical skills training through the Hospital and Polyclinic Week, the Long Term Patient Project, the Silver Generation Ambassador (SGA) programme and Longitudinal Community Experience.

04/ Early Patient Interaction & Clinical Skills Training

This helps to progressively build confidence in patient sensitivity throughout the five years of study.

07/ Comprehensive House System

LKCMedicine's House System assigns personal tutors to all students for guidance and mentorship throughout their years of study.

NTU is placed 1st in Asia and 5th globally in the Times Higher Education (THE) rankings for interdisciplinary excellence in 2026.

Students discuss their wellbeing and academic progress while building relationships with fellow students in their House.

Every student is also encouraged to present at an international conference in Singapore or overseas.

06/ Global Learning Opportunities

Students get to plan overseas community involvement projects to help underprivileged communities abroad.

Students are offered the opportunity to undertake their preferred speciality at a foreign university or placement hospital of their choice for their six-week overseas elective in their final year.

05/ Team-Based Learning

TBL promotes development of leadership, presentation skills, teamwork and critical thinking as well as better knowledge retention.

Breaking away from the conventional lecture-style lessons, LKCMedicine's TBL pedagogy offers flexibility and active participation, allowing students to plan study sessions according to their needs.

NTU is 12th in the Quacquarelli Symonds (QS) World University Rankings in 2026, with LKCMedicine ranked amongst the top 90 medical schools.

10/ Vibrant Student Life at Dual Campus

LKCMedicine students actively engage in a variety of student interest groups and community involvement projects that enrich their medical school journey with meaningful experiences.

Free shuttle buses are provided between the main and Novena campuses, with additional services running every few hours during lesson periods.

LKCMedicine provides a wide range of scholarships and bursaries to support students in need, on top of those offered by the NTU Office of Admissions and Financial Aid.

09/ Scholarships & Bursaries

We are committed to a needs-blind, merit-based admissions policy that ensures no deserving student is denied quality education due to financial difficulties.

08/ Cutting Edge Campus with Bespoke Facilities

LKCMedicine's Experimental Medicine Building (EMB) was awarded the esteemed Green Mark (GM) Platinum Certification in 2024, and its Learning Studio was recognised at the OpenGov Asia Recognition of Excellence Awards in 2025.

The Clinical Sciences Building at Novena Campus boasts state-of-the-art facilities, including a medical library with panoramic views of Singapore.
