

## **Annex A. NBS Freshmen Course Exemptions**

**(Only applicable to AY2026 intake and onwards, subject to review in the event of major syllabus changes)**

### **Important Notes When Applying for Course Exemptions**

- Course exemption is only applicable to Freshmen admitted in that particular Academic Year. The exercise will only be conducted in Semester 1.
- Other than the 6AU BDE exemption for Polytechnic students, students are eligible for exemptions only for core courses in their programmes.
- Students who are granted course exemptions are deemed to have earned the credits awarded to the course. However, the exempted courses do not carry any grades and are therefore excluded from the computation of students' GPA.
- Students seeking course exemptions should confirm their proficiency to avoid knowledge gaps that could impact future learning.
- When requesting exemptions, note that a minimum of [X] AU in letter-graded courses is required for graduation, according to Section 3.4 of the Academic Structure Handbook. Exempted courses are considered non-letter-graded (pass/fail) courses and may have implications for students if they are also considering taking other courses that are on a pass/fail basis, such as credit-bearing internships. Students need to ensure that they satisfy the minimum AU in letter-graded courses for graduation.

**Polytechnic Qualifications**

All polytechnic students enrolled in any 4-year NBS programme with Broadening and Deepening Electives (BDEs) are eligible for up to 6 AUs of BDE exemption. Please submit your application for BDE exemption during the designated exemption application window.
