DIRECTOR'S MESSAGE

The landscape of our world today is an admixture of volatility, uncertainty, complexity and ambiguity. Economies of developed and developing nations alike are facing multifaceted constraints and contractions.

With abounding global and regional challenges, there is a pressing need for public and private sector leaders to develop the necessary acumen so as to steer their organisations through the evolving realities.

Here at the Nanyang Centre for Public Administration, our extensive experience in nurturing leaders over the last three decades has led to the unique design of the Master of Science in Managerial Economics (MME) programme.

Drawing from our expert network of faculty members at Nanyang Technological University, Singapore (NTU Singapore) as well as industry practitioners including government ministers and high ranking leaders, the rigorous curriculum will imbue you with a competitive strategic edge grounded by an economic perspective.

Through our deliberate modular design that reflects an interdisciplinary approach, you will be equipped with skills to craft effective and impactful policies and achieve your policy goals in a calibrated manner. In addition, you will benefit from the insights gleaned from specialised modules that apply economic reasoning into future planning and decision making. You will be equipped to better navigate through conflicts and negotiations, and traverse the technological, marketing, financial and wealth management domains.

As a graduate of our MME programme, you are poised to meet the challenges of sound strategy formulation, analytical decision-making, and be positioned as an invaluable asset to your organisation. I look forward to meeting you in the upcoming semester.

Associate Professor Wang Jue

Director,
Nanyang Centre for Public Administration
Nanyang Technological University, Singapore

GLEAN KEY ECONOMICS INSIGHTS TO IMPACT DECISION MAKING

About the programme

Fully taught in English, the Master of Science in Managerial Economics (MME) programme is open to both full-time and part-time students.

Period of study

Full-time	1 year (2 semesters)
Part-time	2 years (4 semesters)

There are 2 semesters in an academic year with 13 teaching weeks per semester.

Programme structure

10 courses	2 core + 8 electives
8 courses with capstone paper	2 core + 6 electives + capstone paper

The coursework programme comprises 10 courses. Students have the option of taking a capstone paper in lieu of 2 electives.

Besides the 2 core courses in MME, students will be able to choose from a myriad of electives in various topics to build knowledge in domains including:

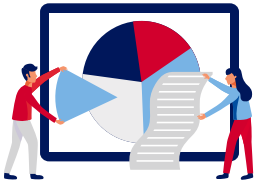

Economics

Technology, Data and Research

Finance

Policymaking, Politics and International Relations

Professional Development Skills

Option to select courses from other graduate programmes

To benefit further from NCPA’s outstanding faculty and resources, students have the option to select up to two relevant courses from other graduate programmes of NCPA and selected schools within NTU as electives to fulfil their programme requirements*.

**Subject to approval by NCPA.*

Admission requirements

- A bachelor’s degree is required for all applicants.
- For students from universities where English is not the medium of instruction, a good IELTS/TOEFL test score is required. Test dates must be within 2 years or less from date of application.

Application period

The programme offers two intakes each year.

Intake	Online application	
	Opening date	Closing date
January admission		
August admission		

Application periods are tentative and subject to changes. You may refer to our website for the actual application period.

Applications are to be submitted through our website at www.ntu.edu.sg/ncpa. Any other forms of submission will not be accepted.

Embrace the volatile global landscape with decisive acumen informed by economic reasoning.

Why choose the Master of Science (Managerial Economics) Programme?

In a disrupted world characterised by evolving realities, the lenses through which management and policy formulation are viewed need to be reframed.

The programme is designed to imbue you with the ability to address new realities, adapt to changing conditions and deliver measurable results.

Unique Economics Masters Programme

Apply economic theories and build managerial skills to steer your organisation through this volatile global landscape, and develop advanced knowledge and skills to support decision-making and forward planning.

Multidisciplinary Faculty with Extensive Experience

Benefit from a holistic learning experience with a rigorous and focused curriculum delivered by multidisciplinary faculty, and glean insights from experts and practitioners with exceptional managerial experience across various sectors and domains.

An Illustrious Alumni Body

Join an extensive global network of 20,000 NCPA alumni who hold decision-making positions at all levels of government in their countries, including roles such as ministerial-level leaders, mayors and heads of organisations.
